

# GET IT RIGHT FIRST TIME

## WHY KLINGER?

Production processes are a key part of the manufacturing industry, all components need to run like a well-oiled machine. With over 100 years of experience in the manufacturing industry, KLINGER provides safe, reliable and cost-effective solutions in compliance with the strictest quality standards. KLINGER's technical know-how, innovation and approach to clients' issues, make us stand out; we believe in providing you with concrete long-term solutions. Working in collaboration with you, we can strengthen the links in your production chain and faults and losses due to downtime become a thing of the past.

KLINGER can add value to all levels of your organization. As the ultimate specialist partner, we can provide you with

high-quality products and reliable services. We focus on plant safety, ensuring the right product reaches the right place, guaranteeing a safe and reliable operation.

As the ultimate specialist partner in process engineering, we are closely involved with what our clients do. We are right by the side of businesses that want to achieve their objective — a sustainable process solution — into results, together with us. We make sure we get to know our clients personally, not through any product, but through our role as a supplier of services, know-how and advice.

We believe in expert analysis and intelligent advice. Experienced product specialists play a major role within our team: people who support you with technical assistance, including for problems that need to be resolved urgently.

We do not deliver a one-size-fits-all product; instead, we go one step further by providing the safest, most reliable and most complete product solution. Many of our products are developed and manufactured in-house. KLINGER not only has detailed knowledge of your product range; it also focuses on functionality within your processes. The result: custom solutions and savings that lift production processes to a higher level!

# OUR INDUSTRIES

Technical know-how is scarce, KLINGER is committed to providing the highest level of technical support to every single client. We offer practical advice backed by our team of experts and if necessary, on-site assistance to help with the selection and fitting of our products. We focus on optimising production processes through innovation and automation so that you can quickly and effortlessly adjust your production lines in the event of new developments.

KLINGER offers carefully considered and intelligent solutions that reduce hazards in the workplace. At the same time, we seek to make a significant contribution to guaranteeing a clean environment for us to live in. KLINGER stands for reliable products and systems that result in lower emissions, less material waste and minimising the risk of hazardous substances escaping.
